EDUCATION

Max Planck Institute for Software Systems (MPI-SWS) & Saarland University (UdS) <i>PhD - Computer Science</i> - Member of the CS@Max Planck Doctoral Program - Advised by Prof. Isabel Valera (UdS & MPI-SWS) - Research interests: multimodal generative modeling, multimodal representation learning, probabilistic inference, and optimization	10/2024 – Present Saarbrücken, Germany
Hanoi University of Science and Technology (HUST) <i>B.Sc. (Honors Program) - Computer Science</i> - Excellence Degree, GPA: 3.87/4.00 (top 1% of class) - Thesis: <i>Continuous Neural Ordinary Differential Equations</i> (Recipient of the Best Thesis Presentation Award)	09/2019 – 09/2023 Hanoi, Vietnam

EXPERIENCE

FPT Software AI Center <i>AI Research Resident</i> - Conducted research on neural ODEs, graph neural networks, and optimization - Advised by Prof. Tan Minh Nguyen (National University of Singapore) and Dr. Thieu N. Vo (University of Bath)	11/2021 – 05/2024 Hanoi and Ho Chi Minh City, Vietnam
Data Science Laboratory <i>Undergraduate research student</i> - Conducted research on continual learning and probabilistic inference - Advised by Dr. Linh Ngo Van (HUST)	04/2021 - 11/2021 Hanoi, Vietnam
VinBigdata <i>Data Analyst Intern</i> - Applied machine learning methods to analyze gene expression changes in individuals following vaccination - Generated detailed reports to support biological data analysis - Advised by Dr. Tham Hoang (Yale University)	07/2021 – 09/2021 Hanoi, Vietnam

PUBLICATIONS

Huyen Vo* , María Martínez-García, and Isabel Valera (2026). <i>Hölder++: Improving Quality-Coherence Trade-off in Multimodal VAEs</i> . International Conference on Machine Learning (ICML). pdf
Huyen Vo* and Isabel Valera (2026). <i>Hellinger Multimodal Variational Autoencoders</i> . International Conference on Artificial Intelligence and Statistics (AISTATS). Spotlight presentation (top 2.5% of accepted papers). pdf
Nghia H. Nguyen*, Tan M. Nguyen*, Huyen Vo , Stanley J. Osher, and Thieu N. Vo (2022). <i>Improving Neural Ordinary Differential Equations with Nesterov's Accelerated Gradient Method</i> . Advances in Neural Information Processing Systems (NeurIPS). pdf
Le Minh Nguyen, Do Quoc An, Vu Quoc Viet, and Huyen Vo (2022). <i>Development of Vietnamese Text-To-Speech for VLSP Challenge 2021</i> . VNU Journal of Science: Computer Science and Communication Engineering. pdf

AWARDS AND HONORS

CS@Max Planck Doctoral Grant <i>Awarded through the highly selective CS@Max Planck doctoral program, with full financial support for PhD study</i>	2024
Excellent Scholarship, Hanoi University of Science and Technology <i>Merit-based scholarship awarded for academic excellence</i>	2020, 2021
Third Prize, Vietnam Mathematical Olympiad (VMO) <i>Awarded in Vietnam's national mathematics competition for high school students</i>	2019

ACHIEVEMENTS

Second Prize, FPT Software AI Center Hackathon <i>Built LLM-based applications for travel planning</i>	2023
Second Prize, UET Hackathon <i>Competed in the Data Science track, with a Kaggle challenge on predicting income from demographic and work-related information</i>	2022
First Prize, Text-to-Speech Shared Task, VLSP <i>Ranked 1st in the Text-to-Speech Shared Task at the 8th International Workshop on Vietnamese Language and Speech Processing</i>	2021

PROFESSIONAL SERVICES

Teaching Assistant: Machine Learning course at Saarland University, Summer Semester 2026

SKILLS

Programming: Python, R, C/C++, Java
Frameworks/Libraries: PyTorch, TensorFlow, Keras, scikit-learn, SciPy, etc
Tools: Linux, Bash, Docker, Git, Weights & Biases

LANGUAGES

English (C1), German (A2), Vietnamese (native)
--
